

# EV Charging SOLUTIONS

Hammond Electric brings its longstanding excellence in commercial and industrial electrical services to offer full-service EV Charging Solutions.

## OUR TURN-KEY SOLUTION

Are you considering adding or expanding your EV Charging stations?

We offer a complete turn-key solution, making it easy for you to benefit from significant utility rebates while Hammond Electric manages the entire process from initial proposals through installation.

Plus, we handle **ALL REBATE PAPERWORK** throughout the process.

## Why Hammond Electric for EV Charging?

- ✓ We are approved to work with both Eversource and National Grid
  - Eversource Approved Make Ready Contractor
  - National Grid Installation Contractor
- ✓ Design and build services for commercial Level 2 units

- ✓ We install any EV unit manufacturer
- ✓ All units are standard for American-made vehicles and compatible with Tesla adapters
- ✓ Each individual unit offers the ability to set rate to charge for electricity or not
- ✓ Our technicians are highly skilled and trained

**EVERSOURCE**

**nationalgrid**

## Benefits and Industry Applications

Many commercial and industrial organizations are adding EV charging stations on their properties. Three industries are leading the EV Charging Station effort with goals and benefits summarized below:

### HOSPITALITY

- Attract more guests
- Add a revenue stream
- Model environmental commitment

### WORKPLACE

- Attract and retain talent
- Increase employee satisfaction
- Reduce carbon footprint

### RETAIL

- Attract/retain customers
- Extend duration of visits
- Become a destination

## Funding and Eligibility – Rebates typically range from 60-100% of the program!

**REBATES**  
**60% –**  
**100%**

There are many programs and incentives available which can be overwhelming for an organization to review and determine eligibility.

Count on Hammond Electric and our knowledge of these programs to assess the opportunities for you and your business.

Incentives are available for Environmental Justice Communities.
